ObamaCare Death Panel Formulas

TRUSTWORTHY INFORMATION • POWERFUL BENEFITS • TRADITIONAL VALUES

Email from GenerationAmerica.org (**Emphasis** added)

Socialized medicine has been in use in other countries for over 60 years. This gives us insight into how ObamaCare can be expected to change our healthcare systems and quality of our care.

ObamaCare was patterned after the United Kingdom's National Health Service (NHS). One of our major concerns is the inherent rationing of care involved with government programs...especially for seniors! Once bureaucrats take control, we know that care will be based on the cost to the government versus the benefit.

NHS has an agency that evaluates and determines drugs, procedures, and technology effectiveness in healthcare. The National Institute for Health and Clinical Excellence (NICE) "...provides guidance to ensure quality and value for money. NICE guidance supports healthcare professionals and others to make sure that the care they provide is of the best possible quality and offers the best value for money."

One term that NICE and NHS use regularly is "Quality Adjusted Life Years" (QALY). QALY is a **formula** that determines if you, as a UK patient, receive the care you need when you are sick. This healthcare rationing formula takes into account several things:

- 1. What is the current "quality of life" of the patient?**
- 2. What will be the "quality of life" of the patient if he/she receives the prescribed care?**
- 3. How many Quality Life Years will the patient have remaining without the prescribed care?**

4. **How much longer will the patient live if he/she is provided the prescribed care?**
5. **AND finally.... what is the cost?**

Each of these questions is assigned a value. If the formula calculation exceeds acceptable values set by NICE, then you don't get the care you need. **In other words, if the cost outweighs the benefit, you lose. You lose your life. This is rationing at its core. It sounds like it is to preserve quality health care but in practice it is only a formula to determine if the government should invest in giving you a few more years.**

If ObamaCare is not repealed, rest assured that the Independent Payment Advisory Board (IPAB), composed of 15 government bureaucrats (aka, Death Panel), will be using "Quality Adjusted Life Years" formulas too. Our government will ration your care and ObamaCare's IPAB will decide who lives and who dies!
